

Specification of GPS file structure WoodAccept from 1.2.2020

Structure of file Nr. 1 - (gps1-xxxxx.csv)

Item Nr.	Description	Data type	Format	Example
1	Intention Nr. (Delivery note Nr.)	Text		ZA345678
2	ID of the route in GPS provider system	Integer		45896
3	Truck registration Nr.	Text	Without spaces, dash, hyphen	PMR3246
4	Loading date and time	Date and time	yyyy-mm-dd hh:mm	2009-04-06 09:27
5	GPS coordinates of loading place in format WGS-84	Text	Nxx.xxxxx,Exx.xxxxx	N50.46742,E14.37767
6	Date and time of finishing the route	Date and time	yyyy-mm-dd hh:mm	2009-04-06 13:43
7	Route distance in km	number	n.nnn	25.123

All items for one route will be at one line separated by semicolon (;). Row will be finished by CRLF. In this file you can provide information about more deliveries. Each delivery at one row.

Example:

```
ZA345678;45896;PMR3246;2009-04-06 09:27;N50.46742,E14.37767;2009-04-06 13:43;25.123
```

Structure of file Nr. 2 - (gps2-xxxxx.csv)

Item Nr.	Description	Data type	Format	Example
Header				
1	Header identification	Text	H	H
2	Intention Nr. (Delivery note Nr.)	Text		ZA345678
3	ID of the route in GPS provider system	Integer		45896
Rows				
1	GPS coordinates of position in format WGS-84	Text	Nxx.xxxxx,Exx.xxxxx	N50.46742,E14.37767
2	Date and time of GPS position	Date and time	rrrr-mm-dd hh:mm	2009-04-06 13:43

All items of **Header** for one route will be at one row separated by semicolon (;). Row will be finished by CRLF. At the first position will be letter **H**, for identification header rows.

All items of Row for one position will be at one row separated by semicolon (;). Row will be finished by CRLF.

There is not limited number of positions for one route.

In this file it is possible to provide information about more than one delivery. Each delivery should start with header and then follow the rows with positions.

Example:

```
H; ZA345678;45896
N50.467,E14.377;2009-04-06 15:32
N50.465,E14.32;2009-04-06 15:34
N50.43,E14.29;2009-04-06 15:39
N50.40,E14.02;2009-04-06 15:45
H;ZA123;45236
N45.438,E14.257;2009-04-06 12:01
N45.425,E14.128;2009-04-06 12:15
N45.446,E14.052;2009-04-06 12:24
N45.489,E14.001;2009-04-06 12:32
```

As decimal separator is used “.” (dot). No thousands separator should be used.

For further questions regarding file structure an data transfer please contact Mr. Karel Uhlík, email: uhlik@aplitax.com

For correct identification of deliveries for particular purchasers is necessary to provide certain prefix before intention Nr.

Purchaser	Prefix	Data send to
Mayr - Melnhof Holz Paskov, s.r.o.	MMxxxxxxxx	gps@wa-mm.cz

Data transfer

Files for processing are sent by e-mail as attachments to the address given in the table above for each prefix.

Before sending files for the first time, you need to send the files for review to uhlik@aplitax.com, preferably from the email address from which the monitoring company will send data.
